

Oh dear! Doesn't the platypus look worried? What do you think is happening in this picture? Think about how the weeds can affect our native animals and environments. How can we help?

A rectangular box containing five horizontal dashed lines for writing.

Check out the website for more information: www.weedbusters.info/

If aquarium plants are dumped into our streams, lakes and rivers, they can quickly choke our waterways and affect the animals that live in them. To prevent this from happening, never release aquarium plants into streams or waterways. Help stop the spread of weeds - become a Weedbuster.

You can find out more about weeds on this website: www.weeds.org.au

Also when you're weedbusting it's a good idea to wear gloves, sunscreen and a hat to protect yourself!
